

2936 siatur JJ

Advantages

- High level of dimensional accuracy during profile belt sanding
- Optimally suited for hand sanding of turned workpieces
- Very adaptable to contours, curves and profiles
- Can be torn to any size required

Applications

- Shaping and fine sanding of profiles and contours
- Intermediate sanding of curves and profiles
- Especially suitable for pneumatic rollers
- Particularly suitable for sanding brushes
- For radii greater than 5 mm during profile belt sanding

Properties

- Removal rate: High
- Lifetime: Very long
- Stability: Very flexible
- Finish: Very good

Product Profile

Grit:	semi-friable aluminium oxide
Adhesive:	synthetic resin
Backing:	jj-wt cloth, cotton
Grit range:	P060 – P320
Coating:	closed
